

ABSTRACT OF THE DISCLOSURE

A retransmission control method is provided. In the method, each of the base stations 2-1 - 2-3 performs error judgment for a signal sent from a mobile station 1. Then, the base stations 2-1 and 2-3 sends results of error judgment to the base station 2-2 which is a communication partner of the mobile station 1. The base station 2-2 sends NACK for requesting retransmission to the mobile station 1 only when every result of error judgment of the base stations 2-1 - 2-3 indicates that there is an error.
